PROFORMA INVOICE

**QUOTATION FOR THE FABRICATION AND INSTALLATION
OF GARRI PROCESSING PLANT OF 2TONS/DAY**

1.	Cassava Peeling Machine.	
	i. 10Hp motor	
	ii. Capacity 1.5mt/hr	₦ 850,000
2.	Stainless steel cassava grater of 1 ton/hr with;	
	i. 10 Hp motor	
	ii. U-Channel frame	
	iii. 3mm stainless Steel housing	₦700,000
3.	Mechanical press/fermentation rack with;	
	i. 3 tons mechanical jack	
	ii. U-channel /H beam frame	
	2 Nos. @ N500,000 each	₦1,000,000
4.	Stainless steel frying pot with;-	
	i. Stainless steel material (inner) 3mm	
	ii. Mild steel material for the outer body	
	iii. Insulating material with fibre glass	
	iv. U-channel frame	
	2 Nos. @ ₦900,000 each	₦1,800,000
5.	Medium Size Hammer for milling dried garri into fine particles	₦700,000
6.	Installation cost:-	₦550,000
TOTAL		₦5,600,000

TERMS AND CONDITIONS OF PURCHASE

PAYMENT:

75% of the total cost will be paid before production of the machines can start. Another 20% of the total cost will be paid at the completion of the production before delivery to the factory site. The remaining 5% will be paid after delivery, installation and test run.

DELIVERY PERIOD: Delivery of the machine shall be 6 - 8 weeks from the payment of the 75% and the clearing of the cheque. Delivery cost will be borne by the client.

INSTALLATION OF THE MACHINES: Two technicians will accompany the plant for the installation and it will take one week once electricity, water and other ancillaries are in place. You will be responsible for the boarding, feeding and transportation of these technicians. The technicians will help you to construct the sedimentation tank if it is necessary.

TEST RUN: Five tons of raw cassava tubers shall be required for the test run and it will be provided by you.

TRAINING: There is no extra cost for training your workers. They will participate in the installation and test run, so that they will be trained on the spot.

WARRANTIES: The warranty period is 1 Year for any production problem excluding changeable parts affected by aging, misuse and accident. The machines are robust, tested, rugged, resilient and very adaptable to rough and humid African conditions. All the parts that have contact with cassava are made of stainless steel to ensure quality and excellence. The machines will last for a long time once they are maintained once a year by changing the bearings.

TECHNICAL SUPPORT: We will give technical support such as supply of spare parts like the bearings, maintenance of the machines, to ensure the product meets the required standard and specifications. We will also help in the export market through consultancy and brokerage.

VALIDITY: The quotation is valid for 90 days from the date of submission after which the price may change.
